It is not possible to invest directly in an index or category average. The maximum sales charge for Class A Shares is 5.75%. Class A Share investors may be eligible for a reduction in sales charges. The total annual fund operating expense ratio, gross of any fee waivers or expense reimbursements, are Class A 1.98%, Class C 2.73%, and Class I 1.73%. The net operating expenses are Class A 1.69%, Class C 2.44%, and Class I 1.44%. The Fund's investment adviser has contractually agreed to reduce its fees and/or absorb expenses of the fund, at least until July 31, 2021, to ensure that the net annual fund operating expenses, excluding acquired fund fees and expenses, will not exceed Class A 1.49%, Class C 2.24%, and Class I 1.24%, subject to possible recoupment from the Fund in future years. Please review the Fund's Prospectus for more detail on the expense waiver.

* The Morningstar Tactical Allocation® is an asset weighted category average of US based open end mutual funds that Morningstar has assigned to this category. Returns do reflect the internal fees and expenses of the funds included in this category but returns do not reflect any sales charges. The Dow Jones Moderately Aggressive Portfolio Index® is a global benchmark that takes 80% of the risk of the global securities market. It is a total return index that is a time-varying weighted average of stocks, bonds, and cash. The index is calculated on a total return basis with dividends reinvested. The S&P 500 Total Return® is the S&P 500 cap weighted index calculated on a total return basis with dividends reinvested. Indexes and category averages are not available for direct investment.

IMPORTANT FUND INFORMATION

Mutual Funds involve risk including the possible loss of principal. ETFs are subject to specific risks, depending on the nature of the underlying strategy of the fund. These risks could include liquidity risk, sector risk, as well as risks associated with fixed income securities, real estate investments, and commodities, to name a few. In general, the price of a fixed income security falls when interest rates rise. The Fund may invest, directly or indirectly, in "junk bonds". Such securities are speculative investments that carry greater risks than higher quality debt securities. Investments in lesser-known, small and medium capitalization companies may be more vulnerable than larger, more established organizations. Investments in foreign securities could subject the Fund to greater risks including, currency fluctuation, economic conditions, and different governmental and accounting standards. Increased portfolio turnover may result in higher brokerage commissions, dealer mark-ups and other transaction costs and may result in taxable capital gains.

There is no guarantee that any investment strategy will achieve its objectives or avoid losses.
